## Education

2022 - 2025

Primakara University

Computer Science || Current GPA :  
3,84/4.00

## Skills

### Programming & Development

- JavaScript / TypeScript
- C++
- HTML5 & CSS3
- SQL / Database Design

### Frameworks & Technologies

- React Native (Expo)
- Node.js & Express.js
- REST API Development
- Supabase (Authentication, Database, API Integration)
- MySQL
- Firebase (Realtime Database)
- Supabase

### Tools & Workflow

- Git & GitHub
- Linux CLI
- API Integration
- Debugging & Troubleshooting

## Additional Skills

- Photography & Photo Editing
- Basic UI/UX Awareness
- Technical Problem Solving

### Language

- English
- Indonesian

## About Me

I am a informatics graduate focused on building practical software solutions across web, backend, and mobile platforms. I enjoy turning ideas into functional products and creating systems that are both efficient and user-oriented.

I have hands-on experience developing real-world projects, including web and mobile applications, backend services, and IoT-integrated systems. My technical stack includes JavaScript/TypeScript, SQL, and C++, along with experience working with databases, APIs, and modern development tools.

Through personal and academic projects, I emphasize clean architecture, maintainable code, and problem-solving driven development. I am motivated to grow as a software developer, contribute to meaningful products, and continuously improve through real implementation and collaboration.

## Experience

- Mobile App Developer – Sonnet Weather
- IoT Developer – Smart Conveyor System
- Web Developer – Photography Web Platform
- Mobile App Developer – Personal Trainer Consulting
- Web Developer – Kindegarten Website (UI contribution)

## Achievement

### Information Technology Specialist – JavaScript

*Issued by Certiport (Authorized under Pearson VUE / CertNexus)  
September 2025*
