ABOUT ME

Junior Software Engineer based in Bucharest, legally authorized to work in Romania without employer sponsorship. Experienced in building web, mobile, IoT, and AI applications using JavaScript, TypeScript, React, React Native, Node.js, REST APIs, Firebase, Supabase, and MySQL. Interested in full-stack, backend, and applied AI development.

EDUCATION AND TRAINING

Bachelor of Computer Science

Primakara University [10/09/2022 – 06/03/2026]

City: Denpasar | Country: Indonesia | Field(s) of study: Information and Communication Technologies: • Software and applications development and analysis | Level in EQF: EQF level 6

CERTIFICATIONS

[Certiport, 23/09/2025]

Information Technology Specialist – JavaScript

[Indonesian Professional Certification Authority, 12/08/2025]

Junior Mobile Programmer

[Primakara University Language Center, 23/09/2025]

PELP (Primakara English Language Proficiency Test)

PROJECTS

Mobile App Developer - Sonnet Weather

- Developed a cross-platform weather application using React Native and Expo.
- Integrated Open-Meteo API and device geolocation.
- Implemented diary feature with export functionality and local storage

Link: <https://github.com/Ry4nsookieboo/Sonnet-Weather>

IoT Developer - Smart Conveyor System (Automation)

- Designed an IoT conveyor system using ESP8266, Load Cell, and Firebase.
- Developed real-time monitoring dashboard.
- Implemented automatic fruit sorting based on weight

Link: <https://github.com/Ry4nsookieboo/iot-conveyor-sorting-system-esp8266>

Web Developer - Tarumenyan Photography Bussiness Web Platform

- Developed backend REST APIs using Express.js.
- Built admin authentication and gallery management.
- Integrated booking workflow via WhatsApp

Link: <https://github.com/Ry4nsookieboo/Website-Tarumenyan>

[Current]

AI Companion Developer - Personal Project Developing a modular AI companion architecture featuring long-term memory, working memory, context builder, attention system, and LLM orchestration. Focused on scalable architecture, persistent memory, and human-like conversational experiences.

Mobile App Developer - Mobile Fitness Application with AI Virtual Trainer

- Built a mobile fitness application using React Native with Supabase Authentication and user profile management.
- Designed and integrated a personalized GPT-powered virtual trainer via a .NET backend API.
- Developed real-time communication features, including personal trainer chat using a JavaScript backend and TDEE calculation tools.
- Configured a development API environment to enable remote mobile testing and backend communication.

Link: <https://github.com/Ry4nsookieboo/personal-trainer-app>

Web Developer - Kindergarten Website (UI contribution)

- Built static website components using Eleventy (11ty), TypeScript, and JSON data files.
- Developed an online enrollment workflow with email-based form submission for administrators.
- Implemented responsive and maintainable frontend interfaces following project requirements

LANGUAGE SKILLS

Mother tongue(s): Indonesian

Other language(s): English (Professional Working Proficiency)

SKILLS

Programming Language

Python / JavaScript / TypeScript / C++ / SQL

Backend

Authentication / REST API / NODE.JS / EXPRESS.JS

Frontend / Mobile

React Native / CSS3 / HTML5

Database

MySQL / Firebase / Supabase (PostgreSQL)

Developer Tools

API Integration / Linux / Debugging / GitHub / Git

Additional Skills

System Design Fundamentals / UI Implementation / Problem Solving
